

SPSI Consulting Analyst Committee Agenda  
June 22, 2022

1. **May 25, 2022 minutes:** Review and approve.
2. **Update from the Ad Hoc Pilot Project Committee:** How are new appointments of analysts of candidates proceeding under SPSI's newly ratified interim plan for qualifying them?
3. **Clarify our views about a long term plan for "Qualifications and Development of Analysts of Candidates:"** Discuss the positive and negative consequences for different directions: vetting, open choice, and various options in between. In preparation for larger group discussions in the fall, we might outline the pros and cons of the alternatives for our thinking and for the benefit of the faculty.
4. **Consider other unresolved questions:** (1) what are the most important clinical competencies we expect a graduate to attain through training at our institute? (a work group has been proposed to study and develop these for SPSI); (2) should we consider recommending/requiring some minimum of in-person contacts for candidates with analysts/consultants?; (3) how/when to revise our evolving committee's policies and procedures? (4) is there further discussion of the option up for faculty consideration for community focused work to replace the 3<sup>rd</sup> control case to meet SPSI's graduation requirements (a study group will be formed to explore its implementation)?; (5) What other guidelines for graduation should we recommend?
5. **New Business**
